# THEORETICAL AND MATHEMATICAL PHYSICS

## Volumes 34-37, 1978

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

## Volume 34, Number 1 January, 1978

| | Engl. | Russ. |
|---|---|---|
| Above-Barrier Reflection of Solitons – V. E. Korepin | 1 | 3 |
| Classical Equations of Euclidean Field Theory – I. V. Volovich | 9 | 15 |
| Fourier Expansion Associated with the Lorentz Group in the Space of Generalized Functions with Support in the Light Cone – Yu. G. Shondin | 14 | 23 |
| Equations for Fields with Complex Spin – S. S. Sannikov | 21 | 34 |
| Relativistic Equations Determined by the Operators of the Exterior Derivative and Generalized Divergence – A. B. Pestov | 30 | 48 |
| Perturbation Theory for Level Shifts and Transition Probabilities in a Relativistic Two-Electron System – M. A. Braun | 36 | 59 |
| Generalized Fokker–Planck Equation and Construction of Projection Operators for Different Methods of Reduced Description of Nonequilibrium States – D. N. Zubarev and A. M. Khazanov | 43 | 69 |
| Hydrodynamics of a Superfluid Bose Liquid with Allowance for Dissipative Processes in a Model with Weak Interaction – S. V. Peletminskii, A. I. Sokolovskii, and V. S. Shchelokov | 51 | 81 |
| Local Perturbations of Translationally Invariant Solutions of the Bogolyubov (BBGKY) Hierarchy – A. K. Vidybida | 62 | 99 |
| Quasiclassical Asymptotic Behavior for Wigner's 3j Symbols – K. S. Borodin, A. E. Kroshilin, and V. V. Tolmachev | 69 | 110 |
| Nonequilibrium Entropy of a System of Interacting Particles in the Low-Density Approximation – Yu. P. Virchenko and S. V. Peletminskii | 76 | 122 |
| Scaling at Short Distances and the Behavior of $R(s)$ as $s \to \infty$ – A. V. Kudinov and K. G. Chetyrkin | 86 | 137 |
| Schrödinger Equation for the Helium Atom – V. K. Tkachenko | 89 | 142 |

## Volume 34, Number 2 February, 1978

| | Engl. | Russ. |
|---|---|---|
| Equations of Motion in Asymptotically Free Theories – O. I. Zav'yalov and I. V. Tyutin | 91 | 147 |
| Pomeranchuk's Theorem at Asymptotic and Finite Energies – Yu. S. Vernov and M. N. Mnatsakanova | 95 | 153 |
| On Renormalization and the $\mathcal{R}$ Operation for Quantum Electrodynamics in an External Field – M. A. Braun, A. N. Vasil'ev, A. L. Kitanin, and Yu. M. Pis'mak | 98 | 158 |
| Equation for the Total Scattering Amplitude in the Variable Phase Approach – M. Kh. Khankhasaev | 106 | 170 |
| Classical Recombination Cross Section – P. V. Elyutin | 112 | 180 |
| Tensor Properties of Second-Quantization Operators and Analysis of Composite Physical Systems – V. P. Karasev, P. P. Karasev, and L. A. Shelepin | 116 | 185 |
| Interaction between Ions through an Intermediate System (Neutral Gas) and the Problem of the Existence of a Cluster of Particles Maintained by its Own Forces. I – A. A. Vlasov, and M. A. Yakovlev | 124 | 198 |
| Interaction between Ions through an Intermediate System (Neutral Gas) and the Problem of the Existence of a Cluster of Particles Maintained by its Own Forces. II – A. A. Vlasov and M. A. Yakovlev | 131 | 208 |

| | | Engl./Russ. |
|---|---|---|
| Spectrum and Correlation Functions of an Anisotropic Heisenberg Antiferromagnet. IV Model of Easy Plane Type with Allowance for Dzyaloshinskii Interaction – V. I. Lymar' and Yu. G. Rudoi | 137 | 217 |
| Kinetic Fluctuations of Brownian Motion – V. V. Belyi and Yu. L. Klimontovich | 147 | 233 |
| Kinetic Theory of Systems in Random Fields – N. V. Laskin, S. V. Peletminskii, and V. I. Prikhod'ko | 154 | 244 |
| Effective Electron–Electron Interaction in a Group-Theoretical Diagram Technique – M. F. Olekseeva and K. D. Tovstyuk | 162 | 256 |
| Nonrelativistic Model of the Interaction of a Scalar Particle with a Quantized Field – A. V. Shurgaya | 169 | 267 |
| On the Shape of Light Nuclei in the Translationally Invariant Shell Model – V. I. Ovcharenko, O. P. Pavlenko, and G. F. Filippov | 173 | 273 |

**Volume 34, Number 3 March, 1978**

| | | |
|---|---|---|
| Quantum Fluctuations and the Structure of Particles in a Field-Theory Model – S. P. Kuleshov and M. A. Smondyrev | 185 | 291 |
| Study of the Scaling Behavior of Semi-Inclusive Distributions by the Renormalization-Group Method – Ya. Z. Darbaidze, N. V. Makhaldiani, A. N. Sisakyan, and L. A. Slepchenko | 192 | 303 |
| Inclusive Electroproduction of Hadrons in the Fragmentation Region of the Virtual Photon – A. V. Kiselev, V. A. Petrov, and A. Yu. Taranov | 198 | 311 |
| Poincaré Invariant Differential Equations for Particles of Arbitrary Spin – A. G. Nikitin and V. I. Fushchich | 203 | 319 |
| Duality of Gravitation in the Quantization Problem – V. M. Nikolaenko | 213 | 334 |
| Equivalence of the Canonical and Grand Canonical Ensembles for One-Dimensional Systems of Quantum Statistical Mechanics – Yu. R. Dashyan | 217 | 341 |
| Method of Self-Consistent Phonon Field in the Theory of Structural Transitions – V. L. Aksanov and N. M. Plakida | 225 | 353 |
| "Hidden Connections" and Functional Integral Representation of the Partition Function of the Canonical Ensemble – M. Bordag and A. N. Vasil'ev | 232 | 364 |
| Three-Dimensional Rotational Relaxation in External Fields – F. M. Kuni, A. A. Melikhov, and B. A. Storonkin | 239 | 374 |
| Distribution of the Total Spin in the Spherical Model with Long-Range Potential – L. V. Bogachev | 247 | 387 |
| Theory of the Absorption of Electromagnetic Waves in Degenerate Semiconductors – S. A. Uryupin | 255 | 398 |
| Linear Relaxation Equations in the Nonequilibrium Statistical Operator Method – V. P. Kalashnikov | 263 | 412 |
| Self-Similar Solutions of the Korteweg-de Vries Equation and Potentials with a Trivial S-Matrix – L. A. Bordag and V. B. Matveev | 272 | 426 |

**Volume 35, Number 1 April, 1978**

| | | |
|---|---|---|
| Analytic Structure of the $3 \to 3$ Forward Amplitude – V. P. Pavlov | 277 | 3 |
| Renormalized System of Equations for Vertex Functions of the Chronological Exponential – V. D. Gordevskii and V. A. Shcherbina | 285 | 14 |
| Structure of Translation Operators in the Phase Spaces of Free Euclidean Fields. I – V. I. Skripnik | 292 | 24 |
| Renormalization of the Background Functional in non-Abelian Gauge Theories – I. V. Tyutin | 295 | 29 |
| $\alpha$ Representation in Scalar Supersymmetric Theory – P. B. Medvedev | 300 | 37 |
| Renormalization of Regge Trajectories in Dual Models – H.-J. Otto, V. N. Pervushin, and D. Ebert | 308 | 48 |

| | Engl. | Russ. |
|---|---|---|
| Symmetry Groups of Scalar Relativistic Fields with Self-Interaction – S. N. Antropov and S. A. Vladimirov | 313 | 56 |
| Kinetic Properties of a Pion Gas – Yu. S. Gangnus, A. V. Prozorkevich, and S. A. Smolyanskii | 321 | 68 |
| Representation of Coherent States in the Theory of Many-Boson Systems – I. A. Vakarchuk | 327 | 76 |
| Many-Particle Correlations in an N-Particle System and Many-Particle Scattering Amplitudes – B. E. Grinyuk and I. V. Simenog | 335 | 89 |
| Fluctuation Effects in a Model of Displacive Ferroelectrics – V. L. Aksenov and N. M. Plakida | 345 | 104 |
| Superoperator Method in the Theory of an Oscillator which Interacts Weakly with a Medium. I. General Results. – V. F. Los' | 352 | 113 |
| Equations of Motion, Green's Functions, and Thermodynamic Relations in Theories of Linear Relaxation with Various Sets of Macroscopic Variables – V. P. Kalashnikov | 362 | 127 |
| Renormalization of the Interaction Amplitude in Three-Dimensional Systems – G. V. Klimachev | 370 | 139 |

## Volume 35, Number 2 May, 1978

| | Engl. | Russ. |
|---|---|---|
| Finite-Energy Sum Rules for the Cross Section of $e^+e^-$ Annihilation into Hadrons in Quantum Chromodynamics – N. V. Krasnikov, A. N. Tavkhelidze, and K. G. Chetyrkin | 373 | 147 |
| Analyticity of the $3 \to 3$ Forward Amplitude in the Neighborhood of the Physical Region – L. M. Muzafarov and V. P. Pavlov | 376 | 151 |
| Two- and Three-Point Functions of Conformal Superfields – B. L. Aneva, S. G. Mikhov, and D. Ts. Stoyanov | 383 | 162 |
| Variable Phase Approach to Many-Channel Relativistic Scattering – A. A. Atanasov | 390 | 173 |
| Integral Equations for Three Particles with Coulomb Long-Range Interaction – A. M. Veselova | 395 | 180 |
| Theory of Disordered Spin Systems – L. A. Pastur and A. L. Figotin | 403 | 193 |
| Corrections to the Diffusion Approximation in Stochastic Differential Equations – S. E. Pitovranov and V. M. Chetverikov | 415 | 211 |
| Damping of a Highly Excited Harmonic Oscillator in a Crystal – B. I. Makshantsev and V. M. Finkel'berg | 423 | 224 |
| Phase Transition in an Exactly Solvable Nonpolynomial Model – V. V. Bryksin, Yu. A. Firsov, and G. Ya. Yashin | 429 | 233 |
| Soliton Excitations in the Model of a Large-Radius Polaron – V. K. Fedyanin and V. Yu. Yushankhai | 434 | 240 |
| Superoperator Method in the Theory of an Oscillator which Interacts Weakly with a Medium. II. Concrete Interaction Mechanisms – V. F. Los' | 439 | 247 |
| Mean Energy and Binary Distribution Function in the Ground State of Bose Systems – M. V. Vavrukh | 449 | 263 |
| Connection between the Asymptotic Behavior of Electromagnetic Form Factors and the Singularities of their Fourier Transforms – V. A. Smirnov | 455 | 273 |
| Theory of the Josephson Current in an SNS Junction with Impurities – S. M. Savchenko and A. V. Svidzinskii | 458 | 277 |
| First Correction to the Quasiclassical Scattering Amplitude – A. V. Kuz'menko | 462 | 282 |

## Volume 35, Number 3 June, 1978

| | Engl. | Russ. |
|---|---|---|
| Crossing Symmetry of Many-Particle Amplitudes – L. M. Muzafarov | 467 | 291 |
| Gravitational Field of Radiating Non-Twisting Charged Systems. I – V. I. Khlebnikov | 470 | 296 |

Scattering on a Nonrelativistic Particle in Strong-Coupling Theory – A. V. Razumov and A. Yu. Taranov ..... 480 312
Sufficient Conditions for Ordering of an Ising Ferromagnet – V. I. Kolomytsev and A. V. Rokhlenko ..... 487 322
Self-Avoiding Walks on a Triangular Lattice – N. D. Gagunashvili and V. B. Priezzhev ..... 494 332
Adiabatic Perturbation Theory for Quasilevels – V. V. Sokolov ..... 499 339
Symmetry of a Magnet and Behavior of Quasiparticle Spectra at Low Momenta – V. G. Bar'yakhtar, V. N. Krivoruchko, and D. A. Yablonskii ..... 508 352
Quasiclassical Theory of the Excitation of a Quantum Nonlinear Oscillator – V. N. Sazonov ... 514 361
Theory of the Influence of Ultrasound on the Josephson Current – G. I. Urushadze ..... 521 371
Finite-Energy Bounds on the Total Cross Section of Strongly Inelastic Interaction between Spinless Particles – Yu. A. Ksaverii ..... 527 381
Estimates of the Eigenvalues of the Schrödinger Equation for a System of Interacting Particles. I – O. Ya. Savchenko ..... 530 386
On Invariant Regularization – A. A. Vladimirov ..... 534 392
Spontaneous Breaking of Conformal Invariance and the Higgs Mechanism – E. M. Chudnovskii. 538 398
Vector Meson in a Quantized Electromagnetic Field – V. G. Zhulego, A. R. Radyuk, and F. I. Fedorov ..... 540 401
Distribution Functions of a Degenerate Fermi Gas with Allowance for Pairing Correlations – A. S. Tyapin ..... 544 406
Kinetic Equation for Spin Waves in a Weak Alternating Magnetic Field – O. A. Ol'khov ..... 552 419
On Boltzmann's H Theorem – L. A. Khalfin ..... 555 425

## Volume 36, Number 1 July, 1978

Investigation of Infrared Singularities in Quantum Electrodynamics by means of Feynman Diagrams – L. D. Solov'ev and Yu. Ya. Yushin ..... 559 3
Wilson Expansion for Chiral Field – I. Ya. Aref'eva ..... 573 24
Algebras of Observables in the S-Matrix Approach – V. A. Il'in and D. A. Slavnov ..... 578 32
Variable Phase Method for Quasipotential Equation in terms of Rapidities – I. V. Amirkhanov, G. V. Grusha, and R. M. Mir-Kasimov ..... 585 42
Description of the Electromagnetic Interaction of Relativistic Particles by means of a Universal Laboratory Time – A. N. Gordeev ..... 593 53
Singularities of the Partial-Wave Amplitudes in the Three-Body Problem – L. D. Blokhintsev and Yu. A. Simonov ..... 600 64
Derivation of Irreversibility of Thermodynamic Processes from Microscopic Reversibility – R. L. Stratonovich ..... 607 74
Thermodynamic Limit for a Classical System of Particles with Hard Cores – G. I. Kalmykov ..... 617 89
Hydrodynamic Spectrum of an Antiferromagnet at Low Temperatures – V. G. Morozov and A. N. Mukhai ..... 624 99
Model of Monomers and Dimers with Interaction – V. B. Priezzhev ..... 634 115
Microscopic Theory of the λ Transition in Liquid $He^4$. I – I. A. Vakarchuk ..... 639 122
Estimates of the Eigenvalues of the Schrödinger Equation for a System of Interacting Particles. II – O. Ya. Savchenko ..... 648 136
Spinor Equation Admitting an Infinite Group – V. D. Bondarev and S. A. Vladimirov ..... 651 141

## Volume 36, Number 2 August, 1978

Can the Weak Interaction Become Strong? – A. A. Logunov, M. A. Mestvirishvili, G. L. Rcheulishvili, and A. P. Samokhin ..... 653 147
Diagram Technique for the Low-Temperature Phase in the Chiral Field Model – I. Ya. Aref'eva ..... 661 159

Algebras of Observables of the Free Dirac Field – K. Yu. Dadashyan and S. S. Horuzhy .... 665 166
Singularities of Feynman Diagrams in the Coordinate Space – V. A. Smirnov..... 676 183
Relativistic Addition of Direct Interactions in the Point Form of Dynamics – S. N. Sokolov .. 682 193
Self-Consistent Theory of Electron Correlation in the Hubbard Model – A. L. Kuzemskii .... 692 208
Stochastic Approach and Functional Models in the Kinetic Theory of Gases – O. A. Grechannyi ..... 702 224
Master Kinetic Equation for a Particle in the Field of Randomly Varying Scatterers – Yu. N. Barabanenkov and V. D. Ozrin ..... 712 240
Complete Nonstationary Density Matrix of Electron–Phonon System in the Functional Integration Representation – E. P. Pokatilov and V. M. Fomin..... 720 252
Allowance for the Effects of Bound States in Positronium – Yu. N. Tyukhtyaev ..... 728 264
Methods of Calculating Many-Loop Diagrams and Renormalization-Group Analysis of the $\varphi^4$ Theory – A. A. Vladimirov ..... 732 271
Construction of the Wigner–Racah Algebra of the Group $SU_3$ – V. P. Karasev and L. A. Shelepin ..... 737 279

## Volume 36, Number 3 September, 1978

Invariant Regularization for Supersymmetric Gauge Theories – V. K. Krivoshchekov..... 745 291
Fourier Expansion Associated with the Lorentz Group in the Space of Functions with Support outside the Light Cone – Yu. G. Shondin ..... 752 303
Spectrum of Diquarks in Two-Dimensional Chromodynamics – V. N. Pervushin and D. Ebert 759 313
Invariant Properties of Weak Interactions and the Cabibbo Angle in Chiral Dynamics – A. A. Khelashvili ..... 765 324
On the Connection between "Pesudopotentials" and the Inverse Scattering Problem Method – V. A. Andreev ..... 773 335
Generalized Solitons of the Schrödinger Equation with Unitary Nonlinearity – Vo Han Fuk and V. M. Chetverikov..... 779 345
Singular Interaction Potentials in Classical Statistical Mechanics – V. A. Zagrebnov and L. A. Pastur ..... 784 352
Partition Function of the Three-Dimensional Ising Model – I. R. Yukhnovskii..... 798 373
Partition Function of the Hydrogen System in the Metallic State – M. V. Vavrukh ..... 816 400
Model of the Passing of the s Term Through the Parabolic Boundary of the Continuum – A. K. Kazanskii..... 825 414
Two-Potential Description of the Electromagnetic Field – Yu. V. Kresin and V. I. Strazhev 833 426

## Volume 37, Number 1 October, 1978

Simplicity of the Quasilocal Algebra of the System of Canonical Anticommutation Relations with Compact Gauge Group – K. Yu. Dadashyan and S. S. Horuzhy..... 837 3
Laplace Transformation of Fourier Hyperfunctions and Related Classes of Analytic Functionals. II – V. V. Zharinov..... 843 12
Probability Structure of a Class of Equations for the S Matrix in Boson Theory – I. D. Chueshov ..... 855 30
Deep Inelastic Asymptotics of the Mandelstam Graph – N. I. Usyukina ..... 862 40
Theory of Multichannel Scattering in Two Spaces – D. R. Yafaev ..... 867 48
Asymptotic Expansion of the Commutator of Heisenberg Fields with respect to Finite-Dimensional Irreducible Representations of the Lorentz Group – Yu. G. Shondin .. 874 58
Four-Loop Approximation in the $\varphi^4$ Model – F. M. Dittes, Yu. A. Kubyshin, and O. V. Tarasov ..... 879 66
Equation of Motion of a Point Source of a Scalar Field in the General Theory of Relativity – S. B. Il'in and É. A. Tagirov ..... 885 74
Born Method in the Problem of Entry of a Term into the Continuum through a Sloping Boundary – A. K. Kazanskii ..... 892 84

Nonequilibrium Statistical Operator Method in the Theory of a Single-Mode Laser Based on Two-Level Atoms – L. A. Pokrovskii ..... 905 102
On the Method of Collective Variables in the Statistical Theory of Fermi Systems of Charged Particles – G. I. Bigun ..... 915 118
Theorem on the Minimal Specific Energy for Classical Systems – A. G. Basuev ..... 923 130
Frequency Spectrum of Monochromatic Vibrations of a One-Dimensional Nonlinear Chain of Finite Length – A. S. Kovalev ..... 926 135

## Volume 37, Number 2 November, 1978

Quarks in Quantized Space – D. I. Blokhintsev ..... 933 147
Theory of Generalized Retarded Operators – V. P. Pavlov ..... 937 154
Fermionization of the $(\sin \varphi)_2$ Interaction in a Box – V. N. Sushko ..... 949 171
Allowance for Relative Group Motion in Charged Scalar Theory with Two Sources – O. D. Timofeevskaya ..... 969 203
Spontaneous Breaking of CP Symmetry in a Nonstationary Isotropic Metric – A. A. Grib, V. M. Mostepanenko, and V. M. Frolov ..... 975 212
Global Effects of the Production of Scalar Matter in Quantum Cosmology – A. O. Barvinskii and V. N. Ponomarev ..... 983 224
Stability of Regularizations of the Schrödinger Operator with Singular Repulsive Potential – I. D. Chueshov ..... 991 237
A Method of Finding the Jost Matrix – V. E. Troitskii ..... 996 243
On a Class of Model Systems that Admit a Lowering of Powers in the Hamiltonian in the Thermodynamic Limit. II – N. N. Bogolyubov (Jr) and D. Ya. Petrina ..... 998 246
Approximation of the Hamiltonian for $(V,\mathcal{N})$ Systems – A. N. Ermilov and A. M. Kurbatov . 1006 258
On Narrow-Gap Electron Spectra of Semiconductors. Two-Band Model with Electron –Phonon Interaction – V. A. Fedorin ..... 1011 265
Reduction of Representations of the Complementary Series of the 2 + 3 de Sitter Group with Respect to the Lorentz Group – V. F. Molchanov ..... 1017 274
Some Spectral Identities for the One-Dimensional Hill Operator – N. E. Firsova ..... 1022 281

## Volume 37, Number 3 December, 1978

Physical Equivalence of the Three Forms of Relativistic Dynamics and Addition of Interactions in the Front and Instant Forms – S. N. Sokolov and A. N. Shatnii... 1029 291
Spherically Symmetric Solitons – V. N. Romanov, I. V. Frolov, and A. S. Schwarz ..... 1038 305
Dynamical Spontaneous Symmetry Breaking – N. V. Krasnikov, V. A. Rubakov, and V. F. Tokarev ..... 1047 319
Quantization in the Neighborhood of a Classical Solution in a Nonlinear $O(3)$-Invariant Theory – O. D. Timofeevskaya ..... 1051 326
Hamiltonian Algebras – G. K. Tolokonnikov ..... 1057 336
Breaking of Conformal Symmetry and Quantization in Curved Spacetime – A. A. Grib, V. M. Mostepanenko, and V. M. Frolov ..... 1065 347
WKB Method for Three-Term Recursion Relations and Quasienergies of an Anharmonic Oscillator – P. A. Braun ..... 1070 355
Elementary Excitations in One-Dimensional Systems with Resonance Interaction – V. K. Fedyanin and L. V. Yakushevich ..... 1081 371
Homeopolar Excitations in a One-Dimensional System of Spinless Fermions with Nonlocal Interaction – A. A. Ovchinnikov and V. A. Onishchuk ..... 1088 382
Bose Condensation into a State with Finite Momentum – V. I. Yukalov ..... 1093 390
Dynamical Behavior of Two-Component Spin Systems in an Alternating Magnetic Field – V. P. Kalashnikov and N. V. Kozhevnikov ..... 1101 402

| | Engl. | Russ. |
|---|---|---|
| Renormalization Group and the Ladder Approximation in Field Theory – K. G. Klimenko . | 1111 | 416 |
| Construction of an Effective Solution of the Problem of Linear Conjugation for Several Unknown Functions – O. V. Meunargiya | 1116 | 423 |
| Decrease of Correlations in Two-Dimensional Models with Continuous Symmetry Group – S. B. Shlosman | 1118 | 427 |
